MONDAY AFTERNOON, NOVEMBER 18, 1833.

A SUGGESTION.—We have heard it suggested, within a few days, that it would be advisable that the tolls on ponderous articles, such as cord wood, stone coal, bricks, &c., transported on the canal, should be reduced very low during the months when there is a superabundance of water in our canal, and made somewhat higher during the summer and early fall months. This suggestion seemed to be a good one. It would be the means of bringing into the State treasury a certain amount of revenue from that superabundance of water which is now unproductively wasted, and would increase the aggregate wealth of the state, by bringing into the general stock, for use and consumption, a vast amount of articles which would have remained useless in or upon the earth.

THE WARREN CONVENTION.—We are gratified in being enabled to place before our readers two letters from members giving accounts of their proceedings. We will add, that General Lacock was selected to preside over the deliberations of the Convention. The amicable manner in which all the transactions of the meeting were conducted—the admirable arrangement which was adopted for placing before the public an expose of the general advantages of a connection between the Pennsylvania and Ohio Canals, and the advantages which each particular rout presented, and the wise and unanimous determination to entrust the *final decision* to the delegates from Philadelphia and Allegheny county, are very satisfactory.

The counties and cities which they represent have no sectional partialities—all that they desire, is, that the best rout may be selected; and there is, in those delegations, talents and experience sufficient to secure to their decision the entire confidence of the people.

The resolution, to refer this decision to the fourteen gentlemen from Allegheny and Philadelphia, having been adopted, *unanimously*, the counties, interested in the routs against which the decision is made, can, with no face of consistency, or modesty, raise an objection.—We may, therefore, rest assured that the Convention at Warren has resulted more satisfactorily than even its most sanguine friends could have anticipated. We did expect that collisions would take place, between the delegates from the Reserve counties and those from the counties in Ohio, south of the Reserve; but we consoled ourselves with the reflection that these collisions would enlighten the subject. For this reason, we thought it desirable that Columbiana, Starke, Wayne, Carroll, &c. should be represented.—We are gratified with the admission of those delegates, and will continue to rejoice, even if the decision should have been made against our own judgment, in favor of the southern rout.—Our feelings are decidedly in favor of the New Lisbon rout, and our judgment as decidedly in favor of the Mahoning. We will not regret to find the judgment of the umpires coinciding with our feelings.

For the Gazette.

MR. CRAIG—The beautiful phenomena of falling stars, which took place on Wednesday morning, though not recollected to have been observed before in such profusion and brilliancy, in this part of the world, have, however, been seen elsewhere, and, undoubtedly, have the same origin with the usual meteors, which, in the cold evenings, especially in autumn, are every season to be seen. Our atmosphere was, on Tuesday, very dark and comparatively moist. We had Indian summer; but it was not that dry air which is filled with particles of smoke only—the cause of our usual Indian summer—the smoke was moistened by an abundance of vapor in the lower regions of the atmosphere. The weather, for four days, had been uncommonly warm for the season of the year; and owing to the heat and the universally distributed moisture, a rapid decomposition of the leaves of vegetables took place. The preceding evening was warm, and from three to four o'clock in the morning of Wednesday, a rapid decrease of temperature took place, and the moisture in the air was cooled down below the freezing point. This change of temperature was accompanied with a sudden excitement and liberation of the electrical fluid—a thing that, in such rapid changes from heat to cold, always takes place. In ordinary circumstances, the electrical discharges take place without being perceived; but, after a warm day in the autumn, every cold evening exhibits more or less of these meteors, which shoot along the heavens like stars falling from the firmament. The moisture that was in our atmosphere, and distinguished, this season, our Indian summer, detained the gasses which rose from the decaying vegetables by absorbing both the hydrogen and phosphorus—the only gasses which ascend into the atmosphere from decaying vegetation. Sometimes, these appear in *Will wi' the wisp*, and at other times, they ascend to a great elevation—where they are set on fire by the electricity in the higher regions of the atmosphere. They, on Wednesday, were low; and when the water in the air congealed by the cold, they were left dry, and the radiations of the electrical fluid set them on fire; and they burned in the strata as they were separated, and showed the innumerable squibs and rockets which were so beautiful and so harmless.

Extract of a letter, to the editor, from a member of the Pennsylvania Delegation to the Warren Convention, dated

"WARREN, (O.) Nov. 16, 1833.

N. B. Craig, Esq:

DEAR SIR—The convention met at this place on the 13th—and, on being called to order, about 100 members produced their credentials, composed of Delegates from several counties in the Reserve, from the counties interested in the Sandy creek rout and Massillon rail road, and the counties of Beaver, Mercer, Philadelphia city and county, and Allegheny county.

The following committees were raised, and reported on the subjects respectively referred to them, viz:

A committee, consisting of two members from each district represented in the convention, "On the general advantages to be derived to the States of Ohio and Pennsylvania, from a connection by means of canals or rail roads between the Ohio and Pennsylvania canals."

A committee, from Trumbull, Portage, and Ashtabula counties, "On the advantages, actual and relative, of a connection by the Mahoning and Portage summit."

A committee, from the counties intersected in the Southern connection, on the advantages presented by the routs in which they are included.

A committee on the charter of the Ohio and Pennsylvania Canal Company; all of which being read, were severally laid on the table, and by a *unanimous* resolution of the convention, the *final decision* of the *mode* and *rout* by which the Ohio and Pennsylvania canals ought to be connected, was referred to the delegation from the city of Philadelphia and Allegheny county.

The entire responsibility, therefore, resting as it now does, on these two delegations, they have considered it imperative on them to proceed to the village of Akron, on this rout, and thence to Massillon, Bolivar, and New Lisbon, to obtain such further information as may there be presented to them, and thereby enable them to form a decision, satisfactory at least to themselves, if not to the public.

The report of these two delegations being final, is, by a resolution of the convention, to form part and parcel of the proceedings of this body, and will settle this long controverted subject, I hope, forever, and have no small influence, I trust, in promoting the speedy accomplishment of this desirable improvement.

The convention adjourned at 2 o'clock, to day, and we proceed, in the morning, by conveyance furnished by the inhabitants of this place, to Akron.

I have given you the above sketch of our proceedings, out of which you can readily manufacture a paragraph for the Gazette, which will be interesting to you all.

P. S.—The decision of the delegations will be announced at Pittsburgh.

Extract of a letter to the editor, from a member of the Ohio Delegation to the Warren Convention, dated—

"WARREN, Nov. 16, 1833.

Dear Sir—The Convention adjourned yesterday, about 100 members were in attendance. The delegates, from the counties south of the Reserve, did not appear in the Convention, at its opening, but, upon invitation, took their seats and participated in its deliberations.—A committee was appointed, consisting of members from the different counties of Pennsylvania and Ohio, who reported on the general advantages of the connection of the Pennsylvania and Ohio Canals, and much valuable information was elicited—committees were also appointed, of members from the county of Mercer, in Pennsylvania, Trumbull, and Portage, on the Reserve, and from the counties south of the Reserve, who reported on the comparative advantages of the respective routs and modes of communication, and the whole was referred to a committee, composed of the delegates from Philadelphia city and county, and Pittsburgh, who, after viewing the different routs, personally, are to report on the best mode of connection; which report is to be appended to and published as a part of the doings of the Convention. The Pennsylvania delegation left this morning, for the west, to view the Mahoning, Sandy, and Massillon routs.

Much harmony and good feeling prevailed throughout the Convention, and the public will soon be in possession of such information as will enable them to act understandingly and efficiently on this important subject."

Latest News From Europe!!

NEW YORK, November 13.—The packet ship Virginian, Capt. Harris, arrived last evening from Liverpool, having sailed on the morning of the 8th ult. We have received papers of that place to the 7th, and London to the 6th, inclusive. The Cotton Market had been better thepreceding day, and prices had advanced above the rates quoted by previous advices.—*Mercantile Adv.*

REPORTED DEATH OF THE KING OF SPAIN.

LONDON, Oct. 5, evening.—We learn that intelligence has been received at Paris, by telegraph, from Bayonne, communicating the information that the King of Spain expired on Sunday, the 29th Sept., at 3 P. M. The Queen had assumed the Regency, and had continued the ministers in office. Every thing was quiet at Madrid.

The Liverpool Albion, of the 7th, states that official accounts of the death of the King of Spain, had been received.

PORTUGAL.

LONDON, Oct. 5.—*Arrival of Donna Maria, and final discomfiture of the Miguelites.*—Our news from Portugal during the week has been important, and all but conclusive of the existing contest. Two attacks, one on the 5th, the other on the 14th, had been both ably repulsed. On the 22d, Donna Maria, after having been Constitutional Queen of Portugal for seven years, for the first time visited the capital of her country. Her reception was most enthusiastic. A splendid tent was pitched in the square, to which the young Queen was led by her father; and there, in the presence of the city authorities, the judges, and magistracy, received and returned the keys of the city. After this ceremony, the procession moved to the Cathedral, where a Te Deum and High Mass were sung in thanksgiving for the occasion. But even more important than this event, is the certain fact that Miguel's army, be it great or small, is without a leader.

Marshal Bourmont, General Clouet, La Rochejaquelin, and the other French officers, who formed the whole and sole strength of the usurper, have resigned their commissions, and abandoned him to his certain fate. Their reasons for this are not known, but despair of success and the inefficiency of their troops, were, in all probability, the real motives for their retirement. Bourmont's place is supplied by a Colonel Macdonald, English or Scotch. No fears were entertained in Lisbon of a renewed attack upon the city, which, at the date of our last advices, the 29th ult., was in the most efficient state of defence. Its available champions are confidently estimated at from 20,000 to 25,000 men. An expedition under Villa Flor was projected to scour the remaining Miguelites from the north, and every thing indicated a speedy termination of the civil war.

From the London Courier, Oct. 5.

We exclusively, on Wednesday, communicated to the public the intelligence of Lord William Russell's return. The Globe and Herald now confirm it, and add that Lord Howard de Walden is to succeed Lord William in his diplomatic functions at the Court of the Queen of Portugal.—Connected with this, we find the following in the London Sunday Herald, of the 6th.

Misunderstanding between Don Pedro and Lord William Russell.—A coolness has evidently arisen between the British ambassador and Don Pedro. It is said Lord William offered his influence to bring the contest to an amicable settlement. Don Pedro replied, it was not for him to propose terms, but if his hopeful brother would quietly leave the country, he should be well supplied with money for his necessary expenses.—Lord William is said to have again pressed the subject; the Emperor requested to know if his Lordship was authorized by his Government; to which Lord Russell replied in the negative, and said it was merely from a desire on his part to see an end put to the contest. The Emperor replied that he was obliged; but he hoped no kind of interference, as Ambassador from England, on the part of Lord Russell would take place; Don Pedro, or the ministers of the Queen, had made no overture for such interference. Coupled with this circumstance, is a rumor of Lord William's speedy return to England. A royal barge had been offered to Lady William Russell, to enable her to visit the Young Queen on her arrival, but was declined by her Ladyship.

From Oporto, they write that the enemy had not altogether withdrawn from before the city; the garrison had consequently been kept greatly on the alert; and, having been considerably reduced by the reinforcements sent to Lisbon, experienced some hardships in providing against the consequences of a renewed attack.

Private letters from Toulon and Marseilles to the 26th ult. have been received. At Toulon much apprehension was felt for the tranquillity of the town and neighborhood, on the approaching 29th of September, the day on which the young Duke of Bordeaux became of age. For several days the military posts in the town had been doubled, the garrison strongly augmented, and patrols stationed in every direction.

There are letters from Constantinople to the 7th of September. It is said that the Sultan had applied to the Russians for troops to defend him against his own dissatisfied subjects; and that in consequence of such an application the English and French squadrons will remain off the Dardanells. It is added, that the English and French Ambassadors had protested against the readmission of Russian troops to the very gates of the capital, but that this step on their part had been disregarded by the Sultan.

LONDON, Oct. 6.—It was confidently stated in Paris on Wednesday, that Talleyrand resumes his diplomatic duties in London in January. It was also believed that the Chambers would be summoned for the 15th of December.

Sir John Herschel is about to proceed to the Cape of Good Hope, for the purpose of making observations on the fixed stars in the southern hemisphere.

The cholera is on the increase in Paris. Twenty deaths took place in the public hospitals last week.

Arch Duchess Maria Louisa has ceded to Madame Letitia, mother of Napoleon, the whole property of the late Duke de Reichstadt, including the legacies left by his illustrious father.

The Count de Survilliers (Joseph Bonaparte) has taken Marden park, near Godstone, for the shooting season; for a while his estate at Bordentown, near Philadelphia, is likely therefore to remain unoccupied.

EAST INDIES.—The following is the list of recent failures, and though out of the debts marked against each house, a considerable dividend may be realized, the distrust, difficulties, and anxiety thus occasioned, together with the other failures which may yet occur, will not be much alleviated by a partial recovery of their assets:—

John Palmer & Co. Calcutta, about		£5,000,000
Alexander & Co.	do.	3,500,000
Mackintosh & Co.	do.	2,500,000
Colvin & Co.	do.	1,000,000
Shotton & Co. Bombay,		250,000
		12,250,000
To which if there is added, as the consequence of them that of Fairlie & Co. London,		1,800,000
Rickards & Mackintosh, do,		950,000
The amount will be		15,000,000

Extract of a letter of the 22d Sept. from Algiers:—Since the late excursions to Belida, when several murders were committed with impunity upon our countrymen, and their bodies left unburied and exposed to wild beasts, between the army on its march to Bilda and the town of Algiers, the Arabs have resumed the offensive on all our lines, and have even passed them. Thus they attempted to set fire to the magazines of forage at Bergadem; they also came by surprise on the establishment for making bread at Ceba, and killed the guard, and have even advanced to the camp at Dely Ibrahim, and that in the plain of Staounelli. All this has been done without any measures being taken on the part of the military authorities to prevent it. Under these circumstances, the settlers and proprietors of lands have expressed an intention to form a company of volunteers to defend themselves.

Extract of a letter, dated Lisbon, Sept. 24.

"Bourmont, seeing what is going on in Lisbon on one side, and the state of the Miguelite army on the other, has thrown up his command, together with Clouet, Larochejacquelin, and all the other French officers, to the number of 150, of all ranks. This is official, and more than official, the certainty of it having been conveyed to me by Lord William Russell, by the English Admiral, and by the private secretary of Don Pedro. All the French officers were yesterday at Villa Franca, on their way to Spain; but this evening I have been assured that Bourmont and Clouet were on board of an English ship of war in the Tagus, and I believe it. An officer, whose name is Macdonald, is said to have taken the command of the Miguelite army; but that army is, in fact, wholly disorganized, and destitute of necessaries."

"This state of misery is further increased by the heavy rains, which have begun to day, and have brought it to such a condition that they cannot long hold together. It is said that already 3,000 men have deserted, and that these not having been able to pass the vanguard of their own army, have gone into the interior. The Queen has arrived, and has been received with the utmost enthusiasm."

Cape of Good Hope.—The enterprising inhabitants of this colony have determined to send an expedition to explore unknown regions towards the centre of Africa, under the direction of Dr. Smith, the assistant staff surgeon, who has already been a great traveler beyond the frontiers; there is a very great spirit among the people of the Cape to encourage the enterprise. Strong oxen wagons, to the number of six, eight, or ten, will be the chief mode of conveyance for the persons composing the expedition, with the baggage, arms, philosophical appara tus, provisions, articles of traffic for barter, &c.; and it is expected that they will be absent for a year or two, according to the distance they may be able to penetrate. Dr. Smith expects to bring back with him objects of natural history, specimens of minera logy, &c. He may possibly discover some rich gold mines, and new creatures of great curiosity and interest to the scientific world.

Emigration.—We were inforned, a few days since, by a gentleman traveling from Ypsilanti, to Detroit, that he met on his way seventy one heavily loaded wagons, besides many lighter vehicles.—This augurs well of the growth and rahid population of the peninsula.—*Detroit Courier.*

The New Orleans Bulletin gives the following estimate of the probable amount of this year's produce in Louisiana:—We may expect 95,000 hhds. of sugar of 1,100 lbs. each, which, at $7 per cwt. is equal to $7,315,000; as many brls of molasses, of 40 galls. at 22 cts, equal to $835,000; total, 8,151,000. Now we venture to estimate all other branches, cotton, cattle, horses, lumber, lime, and tar, brick, &c. at 9,000,000, which would give an aggregate of $17,151,000 as our total produce for the present year.

PHENOMENON.

"THE HEAVENS DECLARE THE GLORY OF GOD."

On Wednesday morning, the 13th inst., between the hours of 5 and 6 o'clock, the Heavens presented a very unusual and brilliant display of shooting meteors, a more full account of which, I hope, will be furnished by those better versed in astrography than the writer of this.

At one period, probably more than 100, of various sizes and brightness, appeared shooting forth from the zenith to the horizon, illuminating, not only the azure vault already bright and clear with the vast number of stars with which it was studded, but actually lighting up our very chambers, as if to allure the slothful to a scene very rarely to be witnessed. They were attended with no noise, at least distinguishable to us, but were remarkable for their number, their startling velocity and vivid brightness with which they seemed to dart athwart the sky, and the brilliant track they left behind.

In a book, recently published, called "THE GEOGRAPHY OF THE HEAVENS," WITH A CELESTIAL ATLAS, by E. H. Barritt, A. M. 104 195 1-2, an account is given of a scene similar to the above.

"Mr. Andrew Ellicott, who was sent out as our Commissioner to fix the boundary between the Spanish possessions in North America and the United States, witnessed a very extraordinary flight of shooting stars, which filled the whole atmosphere, from Cape Florida to the West India Islands. This grand phenomenon took place the 12th November, 1799, and is thus described:—"I was called up," says Mr. Ellicott, "about 3 o'clock in the morning to see the shooting stars, as it is called. The whole heavens appeared as if illuminated with sky rockets, which disappeared only by the light of the sun after day break. The Meteors, which at any one instant of time appeared as numerous as the stars, flew in all possible directions, except *from* the earth, *towards* which they all inclined more or less, and some of them descended perpendicularly over the vessel we were in, so that I was in constant expectation of their falling on us."

The notion that this phenomenon betokens high winds, is of great antiquity. Virgil, in the first book of Georgics, expresses the same idea.

"And oft, before tempestuous winds arise,
The *seeming* stars fall headlong from the skies,
And shooting through the darkness, gild the night
With sleeping glories, and long trails of light."

The subject of Astronomy is a peculiarly delightful study, and is designed to lead to serious contemplation of those stupendous works of the Almighty, above all other departments of human knowledge.

"An undevout Astronomer is mad."

REMITAL.

November 13, 1833.

Phenomenon—Celestial.—It did not fall to our lot to witness a most extraordinary meteoric exhibition which appeared during the latter part of Tuesday night last. It is represented to us as having been the most extraordinary sight that has ever been seen by the oldest of our inhabitants.—Those who speak of it, have some difficulty in conveying an accurate account of it. Some say it looked as if the heavens were pouring down showers of fire—others, that it resembled the falling of brilliant and burning snow—not an occasional spit here and there, but as it would look *in a storm*—save only, that the flakes flew in an *opposite* direction to the wind. It is said to have been of long continuance—indeed to have continued until these fires were quenched in day light.

It is surprizing to see under how many forms electricity manifests itself to the world. We see it in its fiercest, and feel it in its most formidable exhibition, in the lightning. We gaze in wonder at its effects in the Aurora Borealis—are amused at its faint sparkles, in our juvenile frolics in our chamber, in the "black Tabby"—and follow it in the Laboratory, where the ingenious professor elicits it, for the purpose of illustrating its qualities and effects—but we have no recollection of having ever seen it under the form assumed on Tuesday night, except indeed upon a very limited scale.—*Phila. Com. Herald, Nov. 14.*

The Philadelphia Daily Intelligencer, of Nov. 12, says:—"A poor woman who lives in Water street, above Callowhill, in a kitchen cellar, much infested by rats, (such is the lot of the poor,) heard her infant in the course of the night wailing with a faint and interrupted cry. Wearied with the toil of the day, and supposing it merely the fretfulness of infancy, she addressed herself again to sleep. Again she was awakened, and hearing the rats at their infernal revel, she lighted a candle and hastened to the cradle. The sight that met her eyes was most frightful. A number of large rats were feeding upon her infant. The child was already bathed in its blood, and its face and limbs horribly mangled by the animals. With some difficulty she drove off the rats, and rescued her infant. An examination of its wounds, which were numerous and severe, left little hopes of recovery. The physician, however, is of opinion, that though the amputation of the arm may be necessary, the life of the little sufferer may be saved."

Aaron Burr.—Memoirs of Aaron Burr, by M. L. Davis, of New York, are about to be published. The work, it is said, will be prepared under the direction or supervision of Burr. The work has progressed as far as the period of the Mexican expedition.

LONDON, October 10.—Sir J. Herschell is about leaving his residence, near Slough, for the Cape of Good Hope, to make observations on the fixed Stars, in the Southern hemisphere.—Eight wagons were employed in removing his telescopes, transit instruments, and apparatus.

Mr. Richard Heber, one of the greatest book collectors of the age, died, at his residence, at Pimlico, on Friday. Such is the size of the library he has collected that it is said that it will take 365 days, upon a moderate calculation, to dispose of it by auction.

Reappearance of Cholera in Scotland.—It is our painful duty to state that the cholera has again appeared among us, and that several have already been its victims.—*Caledonian Mercury.*

Captain Ross, and the Arctic Expedition.—The Caledonian whaler, from the Davis' Straits fishery, reports having fallen in with the Alfred whaler, of Hull, which had touched at a small island, Lancaster Sound, where the men found two or three portable soup cannisters, and a quantity of tobacco pipes, on which were the word 'Deptford.' It was conjectured that these articles had belonged to the unfortunate expedition of Capt. Ross.—There was not the slightest appearance that there had been any erections for shelter; but the remains of a human hand were also picked up.

How the Yankees Manage.—We receive a weekly paper from Brunswick, Me.—The Pioneer—which is printed by two children of the editor, aged ten and twelve, during that half of the year when they are not at school, and chiefly by them, as we understand, during the other six months.—How can ye make Nullifiers of such fellows? They would get rich on a sand bank.—*Bost. Mercantile Jour.*

Mr. Adams, (Ex President of the United States) one of the Representatives in Congress from the State of Massachusetts, and Mr. Wilde, one of the Representatives from Georgia, and Mr. Duncan, of Illinois, have already arrived at Washington city, to attend the opening of the now approaching session.—*Poulson.*

Massachusetts Election.—From the complection of the returns, so far as they have been received, at the date of the last Boston papers, it is exceedingly improbable that there has been any election of Governor by the people.

The returns from 22 towns gave the following result:—Davis, (National Republican) 6,018; Adams (Antimasonic) 3,906; Morton (Jackson) 2,081; Allen, (Workingmen) 946.

The vote in Boston, was—Davis, 2,735; Morton, 1,258; Adams, 1,181; Allen, 511.

BOSTON MARKET—Nov. 9.

HARRISBURGH CHRONICLE—EXTRA. *Published, Twice a Week, by Hugh Hamilton & Son.—Reports of Proceedings of the Pennsylvania Legislature.*—The Harrisburgh Chronicle will contain a concise and faithful report of the proceedings and debates of the Legislature of Pennsylvania, which will commence its session in Harrisburgh, on the first Tuesday of December next. The Senior Editor will report in one of the legislative branches, and an experienced and competent Reporter is engaged to attend in the other. Such reports will be furnished as are calculated to put the reader in possession of a history of the Session of 1833 4; to do which, the faculty of condensation shall be employed for the benefit of the reader, even though it may sometimes be unpleasant to the legislator; for the topics that must, of course, come up for discussion, will be more numerous, important, and diversified than they have been heretofore, and there is every probability that the exciting questions that must necessarily be agitated in Congress, will also become exciting questions in the Legislature of the State, and add to the interest of the Session.

The proceedings of the Legislature of the State are full of interest to the citizen, and an intimate acquaintance with them is almost an indispensable requisite, when he comes forward on election day to exercise his sovereignty in the capacity of a voter. Hence every citizen ought to possess a fair and faithful report of the proceedings, and it is hoped that those who do not choose the Chronicle will take some other paper for this purpose.

TERMS.—For the Session alone, twice a week, in advance, - $2 00

A FLUTE FOR SALE.

A FLUTE, with extra silver Keys and Slides, and of a superior tone and manufacture—for sale low by JOHN I. KAY & Co.

A Partner Wanted.

THE Subscriber, being possessed of a valuable property in the Borough of Brownsville, in the county of Fayette, and state of Pennsylvania, in a public part of the town, consisting of two and a half lots of ground, bounded by Water street on the north, and the National Road on the south, say 150 feet on each, by 180 feet in depth, on which are erected one large three story Brick Dwelling House, one two story Brick Dwelling House, one Brick Foundry, one three story Stone and Brick Engine Shop; the whole of which are finished for the purposes intended. A considerable business has been and still is carried on in Manufacturing Steam Engines for Steam Boats, Mills, Furnaces, &c. &c.; the Castings for which are made at the foundry; also, other Castings, such as Grates, Stoves, and a variety of other articles, all of which are in demand. The subscriber is fully sensible that an extensive and profitable business could be carried on by an accession of Capital, he therefore wishes to sell one half the above described property to some person as a partner, who would have a few thousand dollars. Brownsville is well situated for such an establishment, being on the Monongahela river, which is navigable the greater part of the year: plenty of good stone coal in the whole vicini y, and in the neighborhood of a number of Furnaces, and as healthy a situation as any in the United States. A further description is deemed unnecessary, as any person wishing to purchase will come and view the premises.

DAILY PAPER AT HARRISBURGH.—The subscribers propose to publish a Daily Paper during the coming session of the Legislature, provided a sufficient number of subscribers are procured to warrant the expense. The necessity of a daily journal at the seat of government, impartial as to politics, and giving the debates of both houses, fully, faithfully, and daily, has long since been acknowledged. Such a paper cannot be sustained in Harrisburg, unless the citizens of other sections of the state come forward and aid in its support. At the present stage of our improvement system, and fiscal conserns of the commonwealth, a daily paper, the statements of which can be depended upon, published at the seat of government, must be a desideratum of all parties. We therefore shall expect that exertions will be made in every section of the state to procure us subscribers.

The Daily Pennsylvania Intelligencer will be printed on a half imperial sheet, for five dollars (in advance,) during the session. It will not only contain full and impartial daily reports of the proceedings of the Legislature, but will contain a summary of the proceedings of Congress, besides news and miscellaneous reading. ☞Post Masters and Agents procuring four subscribers, shall receive a fifth copy gratis.

SIX EGYPTIAN MUMMIES
In the Diamond, next door to the office of The Pittsburgh Gazette.

THE features of some of these mummies are in perfect expression—the hair of the head preserved as if now living. For the direct purpose of giving visitors, of all descriptions, that wish to see the ancients themselves, and likewise the bodies that were embalmed not less than three thousand years ago, this collection was exhibited to a numerous concourse of visitors, in the city of Philadelphia, for the space of 3 months; and next in Baltimore, in the Museum, for five weeks, where contract was only made for two weeks, and continued for five weeks by request. The inhabitants of this city, it is hoped, will call, and patronize a collection worthy the attention of the curious.

The proprietor is authorized to use the names of the most eminent physicians and professors in the city of Philadelphia, and likewise that of Baltimore.

FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Frankiin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40

other lots, containing about 6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county---and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others--- a soil rich and productive---the neighborhood abounding in coal---well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

PERIODICALS.

AMERICAN RAILROAD JOURNAL, and Advocate of Internal Improvements, which is designed as a repository of the accounts of the rise and progress of numerous works of Internal Improvement, in the United States particularly, and in other parts of the world generally. The work is published weekly, and forms a large octavo volume each year, of 832 pages of 3 columns each, for $3 per annum, in advance.

New York Farmer, and American Gardener's Magazine. This work is designed for the agriculturist, and will be found to contain much, both interesting and profitable, to those who cultivate the soil as a business, or merely a garden for amusement. Published in monthly parts of 32 large octavo pages, with three columns each, at $3 per annum, in advance.

Mechanics' Magazine, and Register of Improvements and Inventions. To the Mechanics of the United States---In this populous and enlightened country, almost every description of persons can obtain knowledge and amusement connected with their peculiar pursuits, through the medium of the Journal or Magazine, especially devoted to their interests. The Theologian, the Farmer, the Philosopher, the Sportsman, and even the Plough Boy, has each his Journal, where he can find a record of the passing events of the day, connected with his peculiar avocations and recreations. Hitherto, the Mechanics (who form a large and most important portion of the community) have had no Journal, to which they could turn, with the certainty of finding that information they desire, no periodical of which they could say: 'This is ours, and for us.' In the hope that the attempt to supply such a want at a price so reasonable as to be within the reach of all, will meet with your active support, the subscriber proposes to publish, on the first day of each month, a Mechanics' Magazine. It will contain a well digested selection of the most useful and interesting articles in the London Mechanics' Magazine, London Register of Arts and Sciences, Repertory of Inventions, Library of Useful Knowledge, Journal of the Franklin Institute, and other works, connected with the arts and manufactures, published in this country and in Europe, accompanied with numerous and well executed Engravings. Its pages will be open for the communications of all, and especially for those of the practical artisan, to whose interest it will be particularly devoted. The Mechanics' Magazine will contain, also, a due portion of the occurrences of the month, Scientific and Literary Reviews of Books, Anecdotes, Economical Receipts, Reports of the state of Mechanics' Institutions, and other Scientific Societies in this state and other countries. To be published monthly. Each succeeding number will contain 64 pages, handsomely printed, and stitched in a neat cover. SATIN BEAVER HAT MANUFACTORY,

NO. 6 ST. CLAIR STREET,
PITTSBURGH.

WILSON & SMITH, from N. York,

RESPECTFULLY inform the citizens of Pittsburgh and the neighboring towns, that they have commenced the manufacture of the above beautiful and elegant article, so much admired and worn throughout Europe, and the principal cities in the United States.

W. & S. beg leave to observe, that, after various experiments, they have at last succeeded in bringing this Hat to the highest state of perfection, and they can assert, with confidence, that in point of color, lightness, elasticity, durability, and general beauty of appearance, they cannot be surpassed by the most expensive Hat that is made. Gentlemen are invited to call and examine them, and judge for themselves.

Wholesale Dealers supplied at the same prices as in the New York markets.

DOCTOR ROBERT'S

☞ *WELCH MEDICAMENTUM* ☜

FOR the cure of Dyspepsia, Liver Complaints. Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

Utica, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer s vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradully increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention. state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.

VALUABLE PROPERTY FOR SALE.

THE Subscriber offers for sale the farm on which he lives, in Washington county, on Pigeon creek, one mile south of Williamsport, on the Monongahela river, to which there is a perfectly level road. This farm contains near 400 acres, the greater part of which is first rate land. There is on the premises a Brick Dwelling House, a Merchant mill, in good repair, a new saw mill, a stone still house, 35 by 40 feet; a salt works is also in operation, and worked to advantage; about 150 acres of land cleared and under good fence. There is on the premises three small tenements for the accommodation of families. This tract is well timbered, and abounds with stone coal and springs of water, both of the best quality.

To a person wishing to embark in a manufacturing business, and possessing capital, this would be a very desirable situation, having the advantage of both water power from Pigeon creek, and banks of the very best coal near to the works, and easy of access, and its vicinity to so navigable a river where articles of any kind are so cheaply transported to Pittsburgh.

For further particulars, apply to James P. Stuart, Merchant, Wood street, Pittsburgh, or to the subscriber on the premises.
